ADIB BUSINESS PACKAGES SEGMENTATION ELIGIBILITY

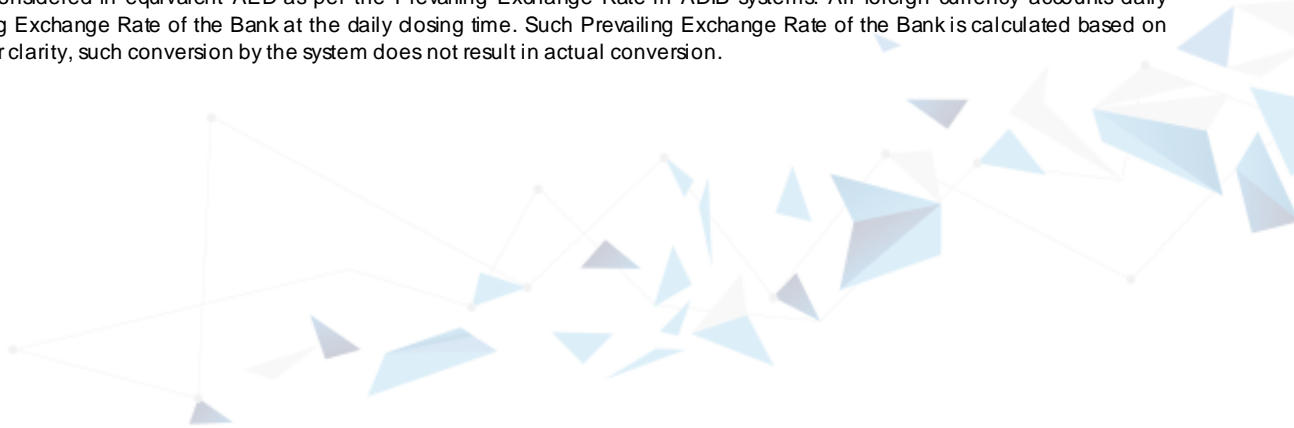

The segmentation is based on the average of the sum of the monthly averages of the daily dosing balances of all investments and current accounts in a period of 5 months (calculated as the sum of monthly averages of the daily dosing balances of all investments and current accounts in a period of 5 months divided by 5, and the monthly average of the daily dosing balances of each account is calculated by dividing the sum of the daily closing balances of such account in each calendar month by the number of days in such month).

As a result, each customer would be classified either under Business One, Business Premium or Business Elite or Merchant account.

The above segmentation process shall be done twice per year in June and December respectively. Consequently, the monthly charge shall be applicable for the 6 months following the month of the segmentation irrespective of the average of the sum of the monthly averages of the daily closing balances of all accounts during these 6 months as follows:

Segmentation in June	The fee shall be applicable starting from July 1 st till December 31 st
Segmentation in December	The fee shall be applicable starting from January 1 st till June 30 th

The average balance for any foreign account(s) shall be considered in equivalent AED as per the Prevailing Exchange Rate in ADIB systems. All foreign currency accounts daily closing balances will be converted into AED at the Prevailing Exchange Rate of the Bank at the daily dosing time. Such Prevailing Exchange Rate of the Bank is calculated based on the mid-rate calculated during the day for each currency. For clarity, such conversion by the system does not result in actual conversion.
